# 1. OVERVIEW

- If you need to easily manage images or advertisements on your nopCommerce site, then MDC Image Slider is the right solution for you. This plugin combines a rich set of features and adjustment options while requiring minimum effort to install and configure.
- You can define as many sliders with different image sets you need and put them anywhere on your site, as many times you want! Adding and editing images is quick and intuitive, and configuring the options is straightforward.
- You can set your images to have captions and to link to pages within your site or other sites, which may come in handy for clickable advertisements, offers, discounts or sliders for your own products.
- MDC Image Slider is based on JQuery which offers customization of various animation and navigation settings. All of these settings are accessible from the administration backend providing you with the ability to configure the slider to suit your preferences.
- The plugin is fully localizable. A complete list of the localization resources used is shown for your convenience.
- **Each instance of this plugin can be used for any need (image slider, bunner...).**

## 2. FEATURES

Easy to install and configure from the nopCommerce Admin panel.

- Based on **Nivo slider**.
- Support for **multiple sliders** with different images and settings.
- **Predefined** or **custom widget zones** - any slider can be added to any widget zone.
- **Auto-resizing images** to fit the slider dimension.
- Easy to set images text (**captions**).
- Defining **custom links** when images are clicked.
- Various animation and layout **configuration settings**.
- Comes with **1 year FREE Support** and **1 year FREE Updates**.
- Developed according to nopCommerce and Microsoft technology standards and coding guidelines.
- Tested with all major browsers

## 3. INSTALLATION

In order to install the product follow these steps:

1. Copy the Widgets.Slider folder into the Plugins folder located in your NopCommerce web site root.
2. Go to the Admin panel of your NopCommerce web site and select **Configuration** -> **Plugins**:

**PLUGINS**

Manual plugin installation:

1. Upload the plugin to the /plugins folder in your nopCommerce directory.
2. Restart your application (or click 'Reload list of plugins' button).
3. Scroll down through the list of plugins to find the newly installed plugin.
4. Click on the 'Install' link to install the plugin.
5. Note: If you're running nopCommerce in medium trust, then it's recommended to clear your \Plugins\bin\

Group	Friendly name	System name	Order	Installed	Configure	Installation	Edit
Discount requirements	Billing country is	DiscountRequirement.BillingCountryIs	1	true		Uninstall	Edit
Discount requirements	Customer had previously purchased all of these product variants	DiscountRequirement.PurchasedAllProducts	1	true		Uninstall	Edit
Discount requirements	Customer had previously purchased one of these product	DiscountRequirement.PurchasedOneProduct	1.04	nopCommerce team	1	true	Uninstall Edit

3. Click on the "**Reload list of plugins**" button to the right
4. Find the Widget Slider in the list of plugins and click on the Install button to install it
5. What is left to do is to integrate it with your web site

## 4. INTEGRATION

Once you install the plugin you will need to integrate it with your website.

### WIDGET INTEGRATION

- First thing you need to do is to enable the plugin. Go to **Admin -> Content Management -> Widgets** and set the plugin option "**is active**" to true.

false	Edit		
true	Edit		
<input checked="" type="checkbox"/>	Update	Cancel	
true	Edit		
true	Edit		

- Go to **Admin -> Content Management -> Widgets** and click on the Image Slider Configure link. Here you can select the default zone, or you can define a new zone in which you want to display the plugin. Also several zones can be active simultaneously.

Widget zone name	Widget zone description	Enabled	Change status	Delete zone
header_menu_after	After header menu	<input type="checkbox"/>	<button>Enable</button>	<button>Delete</button>
mobile_infoblock_middle	mobile infoblock middle	<input checked="" type="checkbox"/>	<button>Disable</button>	<button>Delete</button>
header_menu_after_home	header menu after home	<input checked="" type="checkbox"/>	<button>Disable</button>	<button>Delete</button>
<b>New zone</b> ➔ Widget zone name: <input type="text"/> ➔ Widget zone description: <input type="text"/> <button>Add zone</button>				

## 5. USER GUIDE

The user guide provides general information on the administration and integration of the plugin for maximum use of its functions.

Go to **Administration -> Plugins -> Image Slider**

**\*First thing you need to do is to choose the zone for which you will continue to edit its content. If we want to define a new slider first create a new zone (or add to an existing zone) and then edit its content!**

**IMAGE SLIDER CONFIGURATION**

➔ Select widget zone:  (Homepage slider zone)

### 1. NEW IMAGE

- Go to **Administration -> Plugins -> Image Slider**, click on the button **"Add New Image"**.
- Here you can upload one or more images.

UPLOAD NEW IMAGES (Back to Image Slider Configuration)
REGISTER

Select...

UPLOAD EVENT LOG

Back to Image Slider Configuration

- For defining the other attributes of the image go into Edit mode of that image

### 2. SLIDER OPTIONS

- Here you can specify default values or configure to your needs
- You can see all configurable options and their description following this link:  
<http://nivo.dev7studios.com>

### 3. CONFIGURE

- To access the configuration go to **Admin** -> **Content Management** -> **Widgets** and click on the Image Slider Configure link or click on the “**Configure**” link in the upper right corner in Image Slider administration
- In Configure despite the administration of the zones there are a few other options:
- Localization resources (serves for overview of the localized resources)
- Registration (form for entering the registration key)
